

Preparing Wilson County for the Next 25 Years

In 2006, Wilson County adopted the Gateway Land Use Master Plan to guide development and growth in eight gateways. It is time to update the plan. It will:

- **Guide land development decisions and infrastructure investments,**
- **Identify suitable areas for residential, commercial, agriculture, and industrial development, and**
- **Identify areas that should be preserved and conserved.**

This is the start of a countywide initiative to engage residents and others in a conversation about future growth and investments.
